IT'S TOO COLD TO RECORD AGAIN

**MP4Fix**

REPAIRS FREEZING CRASHED VIDEOS

download from Google Play Store

## MP4Fix will make a noise in the world soon!

MP4Fix Video Repair Tool is **the only App** on the Google Play Store that recovers corrupted phone videos in mp4 format. MP4Fix repairs videos broken by camera crash, dead battery and lack of memory.

With 500 000 downloads and more than 5 000 five stars ratings MP4Fix proves its reliability.

MP4Fix saves your day!

MP4Fix automatically finds broken videos.

Correctly recorded video is automatically suggested.

## Details

MP4Fix searches for crashed files and shows all broken items on the list.

It's easy to choose the one to fix.

There are 3 types of icons that describe video files:

a crashed video

a fixed video

a file that can't be fixed because of lack of data

To use the App another correctly recorded video is necessary. The correctly recorded file provides the video "header" to the broken one. The video "header" contains information about the file that is lost when the video is broken.

The correctly recorded file has to be recorded on the same phone, using the same App as the broken one. It has a twin "header" then and can be used to repair the broken video.

MP4Fix suggests the correct video but it can be changed if necessary.

Selecting repair button starts the repair process.

MP4Fix saves your day!

The duration of repair process depends on the size and the type of a crashed file. Usually it takes from few seconds to few minutes. In some special cases it can be even few hours. Still, the phone can be used normally during the process.

**SUPER FAST**

Repairing...

VID\_20171028\_127037.mp4

00:11 recovered 66%

And you can use your phone normally while the repair runs in the background.

**RELIABLE**

All data recovered

VID\_20171028\_127037.mp4

Whole file processed and recovered 00:18

If you expected a longer video we're sorry but there is no more data in the file so nothing else can be recovered.

In case the video does not play correctly try repairing again. Next time select a different correctly recorded file to copy header from.

- Preview **FREE**
- Repair Again **FREE**
- Save
- Play
- Share

Watch for free before purchase and buy to save, share and play full screen.

**FREE PREVIEW**

MP4Fix Preview

00:04 00:34

Watch for free as many times as you want.

MP4Fix keeps the broken file unchanged and new, repaired file is created. The fixed video can be previewed for free anytime. It can be enough for less important videos. Watching full screen, saving and sharing requires a small one-time purchase of "Premium Features". The purchase is valid indefinitely.

## MP4Fix is sociable

- we offer competent e-mail support ([hello@mp4fix.com](mailto:hello@mp4fix.com))
- In 2017 MP4Fix [website](#) was created
- In 2017 we launched [YouTube Channel](#) and our first [video](#)
- [Facebook Profile](#) is growing every week:)

We listen to our clients and love their comments:

*“Holy cow its worked! My 30m video worked. Was worth every penny, thanks.”*

*“Outfrickingstanding!!!!”*

*“The best app. I can’t even think about getting the file back. WOW loved it.”*

*“This app cost the price of a gourmet sandwich. Thank you creator for making this very easy, intuitive, simple and effective app... you earned every cent.”*

*“If I could rate it 10 stars I would, repaired my long damaged video in few seconds!”*

## Lastly, a bit about the MP4Fix beginnings

Once upon a time there was no App to fix broken phone videos. There was only an expensive and complicated computer software not suited for fixing simple phone videos. Suddenly in 2015 some smart developer lost his phone video where he was recording his sweet crawling daughter. Enough is enough! In the same year he developed MP4Fix App that fixes his and hundreds and thousands other phone videos.
